SJ Public School — Rajasthan, India
Secondary Education (Class X) — *2021 – 2022*

Experience

Software Development Intern — May 2026 – Present
Fintness Finserv Pvt. Ltd. — *India*

- Develop internal engineering tools, including WhatsApp automation using Google Apps Script, Google Sheets, and the Periskope API for automated messaging and group creation.
- Developed the company's website (fintness.in) and building a financial-services CRM and internal ERP platform supporting client management, documents, tasks, reviews, chat, and operational workflows.

Founder & Software Developer — Apr. 2026 – Jul. 2026
Zenvista Tech — *India*

- Founded a digital solutions venture, delivering business websites and managing requirements, UI/UX, development, and deployment; later pivoted toward software engineering and product development.

Freelance Software Developer — Ongoing
Self-Employed — *India*

- Develop software solutions from planning through implementation, balancing business requirements, usability, and maintainability.

Projects

Fintness CRM 2.0 | *React, Node.js, Express, PostgreSQL, Socket.io, S3 storage buckets* — crm.fintness.in

- Developing a Progressive Web App (PWA) combining financial-services CRM capabilities and internal ERP workflows to centralize customer information, business operations, and team coordination.
- Supports lead and client management, documents, tasks, insurance policy reviews, business prospects, queries, portfolio reviews, leave management, and integrated chat for internal communication.
- Brings customer records, business activities, reviews, and team communication into one platform, helping reduce fragmented workflows and manual coordination.
- Reduced the client-list payload from 61.9 MB to approximately 908 KB and improved refresh behavior, file storage, responsiveness, and mobile usability.

Xenio – Personal AI Assistant | *Python, JavaScript, AI APIs, Desktop Automation* — GitHub Repository

- Built a personal AI assistant with memory and productivity-tool integrations, vision capabilities, and desktop interaction for everyday computer workflows.
- Implemented application launching, keyboard and mouse automation, and multilingual interaction, with safeguards for tool usage and permission handling.

Fit n Blaze – Gym Website & Management System | *JavaScript,Razorpay, FaaS* — fitnblazegym.com

- Developed a gym website and management system with member progress tracking and dedicated workflows for gym owners and trainers.
- Used Razorpay for payment-related functionality and Function-as-a-Service (FaaS) for serverless functionality.
